CAREER OBJECTIVE

Motivated Information Technology student seeking an internship from **11 January 2027 to 13 August 2027** to apply my knowledge of full-stack web development, data analytics, computer networking, IoT systems, and database management in a professional environment. Eager to contribute to technology-driven projects, solve complex problems, and develop secure and efficient digital solutions that support business operations. Committed to continuous learning, collaboration, and developing practical skills to become a well-rounded IT professional.

EDUCATION

Bachelor in Information Technology (Hons)

Jan 2025 – Apr 2028

Universiti Teknologi PETRONAS, Seri Iskandar, Perak

- Current CGPA: 3.62
- Dean's List award for semester II, III, IV, V

Matriculation in Basic Engineering

July 2023 - May 2024

Kolej Matrikulasi Kejuruteraan Kedah

- CGPA: 3.50

ACADEMIC PROJECTS

TimeSync, Web Application Project

2026

Tech Stack: PHP, MySQL, HTML, CSS, JavaScript

- Developed a full-stack web-based meeting scheduling application that enables users to create polls, propose multiple time slots, vote on availability, and identify suitable meeting times.
- Implemented user authentication, database-driven event and voting management, and interactive dashboards with a responsive interface to provide a seamless scheduling experience across devices.

Enterprise Departmental Network & Security, Information Assurance & Security Project

2026

Technologies: Cisco Packet Tracer, Static Routing, Subnetting (IPv4), SSH

- Collaboratively designed and configured a secure multi-department enterprise network using IPv4 subnetting and static routing to enable reliable inter-department communication.
- Implemented SSH authentication and firewall rules, and performed connectivity testing and cybersecurity analysis to identify and mitigate potential network vulnerabilities.

Village 5 UTP Horror: 3D Multilevel Game, Object Oriented Programming Project

2025

Tech Stack: Unity, C#, Visual Studio, GitHub

- Collaboratively developed a six-level, first-person 3D horror game in Unity, applying object-oriented programming principles including inheritance, polymorphism, encapsulation, and abstraction to support modular game systems.
- Contributed as a level designer, sound designer, and playtester, developing level environments and integrating immersive audio, enemy encounters, item-collection mechanics, and trigger-based interactions to enhance the horror gameplay experience.

CarePal, Elderly Care Application, Software Engineering Project

2026

Technologies: Figma, UML, Firebase, SQLite

- Designed a mobile elderly-care application featuring fall detection, SOS alerts, medication and appointment reminders, caregiver monitoring, and an accessibility-focused user interface.
- Applied software engineering practices to develop system requirements and architecture, including SRS/SDD documentation, UML diagrams, database design, and a low-fidelity UI prototype.

Restaurant Chain Management, Database System Project

2025

Tech Stack: Oracle SQL, Relational Schema (3NF), DDL/DML

- Designed a normalized relational database schema (3NF) encompassing 13 core entities to manage multi-branch

restaurant operations, reservations, inventory, and point-of-sale transactions.

- Implemented the database using Oracle SQL with DDL and DML statements to create, manage, and manipulate relational data across interconnected tables.

EXTRACURRICULAR ACTIVITIES

Secretary II & IT Facilitator

2026

SparkSTEM, Community Engagement Project

- Organized a STEM outreach program for Form 3 students at UTP, managing official documentation and correspondence while supervising the Media Department and coordinating team deliverables.
- Facilitated the Scratch & Play module, teaching students basic programming concepts and guiding them in developing interactive games using Scratch.

Media Committee

2026

UTP Citra Nusantara Club

- Created promotional content and event materials while maintaining consistent visual branding across media platforms.
- Supported event coverage, documentation, and publicity while coordinating media deliverables with other committee.

Sponsorship Committee & Game Coordinator

2025

UTP Mobile Legends Tournament

- Supported sponsorship outreach and coordination, contributing to sponsor engagement and tournament preparations.
- Coordinated tournament matches by managing game lobbies, monitoring gameplay, verifying results, and maintaining accurate score updates throughout the event.

WORKING EXPERIENCE

Retail Sales Associate

Dec 2025 – Jan 2026

Haji S. Abdul Wahab Jewellers

- Assisted customers with jewellery, gold, diamonds, and other products, including custom orders and gold trade-ins, while supporting inventory management, billing, promotional sales, voucher activities and creating promotional video content for marketing

Founder and Small Business Owner

Jan 2025 – Present

Syaffia.co

- Founded and managed a small consumer business offering beauty and wellness products, overseeing product planning, pricing, inventory, customer orders, sales, and social media marketing.

SKILLS

- **Programming Language:** Python, C++, C#, R, PHP, JavaScript, Visual Basic (Intermediate)
- **Web & UI/UX Design:** HTML, CSS, Figma (Intermediate)
- **Databases & Analytics:** MySQL, phpMyAdmin, RStudio, Oracle SQL, Microsoft Excel (Intermediate)
- **Networking & Security:** Cisco Packet Tracer, Huawei eNSP, Wireshark (Intermediate)
- **Tools & Platforms:** GitHub, Visual Studio, VS Code, Unity, Arduino, Tinkercad, Canva (Intermediate)

ACHIEVEMENT

- Yayasan UTP Education Grant Sponsorship (2026)

Ts Dr Halimaton Saadiah Hakimi
